

PRECAUTIONARY MEASURES

- All participants must sign a waiver releasing SYT from any liability related to contraction of COVID-19
- Adults aside from SYT staff will not be allowed downstairs to the camp space
- SYT staff, with masks on, will meet campers outside at designated drop-off area.
- Temperatures will be taken by SYT interns for each camper at the beginning of each day before allowing them to enter the building
- All campers will be required to wash their hands/sanitize first thing when they enter the camp area.
- Each camp will remain separate from each other to minimize contact, and camps will stagger start times in order to minimize the amount of students entering the building at one time.
- Each class size will be limited (10 student limit for 3rd-12th grade; 8 student limit for K4-2nd grade).
- Classroom and common use areas will be cleaned every day before and after camp.
- Chapman Cultural Center will increase hygiene in all restroom areas.
- Wearing masks is based on the regulations of federal or local authority. Instructors will wear masks if they feel more comfortable wearing one on the premises of the Youth Theatre.
- If you wish for your child to wear a mask during camp, you are welcome to send one with your child each day.
- Snacks (snacks brought from home) will be eaten outside with teacher.
- Due to the nature of theatre and the need to be done with others, we will be unable to ensure a 6 feet apart distance with campers and their instructors, but we will make every effort to adjust the class so that we minimize physical contact, including refraining from shaking hands, hugging or other physical contact.
- Although we will not have in-person performances, the end of the week performances will be filmed. We will send the recording out to every participant so you can have a family viewing party at home to watch your child's hard work!
- If SYT is forced to cancel camps due to any new developments related to COVID-19 based off of state requirements, a full refund will be issued for the affected camps.

RISK-FACTORS & RESTRICTIONS

- Students with a cough should not attend. We recognize coughs can be allergy or cold related. At this time, we will avoid all coughing.
- If your child is particularly vulnerable to COVID-19 because of any risk factors, please refrain from enrolling your child in a camp.
- Refrain from sending your child to camp if your child or anyone else you and your child have been around shows symptoms of COVID-19 (cough, fever, shortness of breath, chills, muscle pain, sore throat, loss of taste or smell).
- If a student or immediate family member has traveled out of the state or country, a two week quarantine is required before returning to SYT. SYT must be notified.

- In the case that you or your child test positive for COVID-19 after attending camp, please inform SYT as soon as possible.
